

**Kit contents**

- 1x Light bar
- 4x M6 Stainless button head screws
- 4x M6 Stainless Nuts
- 4x M6 Stainless washers

**Tools Required**

- 3mm & 7mm Drill bit
- Drill
- 4mm Allen Key

Using masking tape, run a piece approx 8" (200mm) long along the outer edge of the gutter. Do this on both sides

Offer up your new light bar to ensure that it sits in the correct position that allows you to fit the lamps of your choice in the position you prefer (on top or underneath the light bar mount).

Once you are happy with a position mark the front bolt position with a vertical line on the masking tape. Mark both sides.

Check with a tape measure from a fixed point to ensure both sides are equal and visually by eye that the bar looks straight.

Measure from the first mark back 118mm and mark it again.

Centrally between the outer edge and roof line drill a small 3mm hole at each point in line with the marks you drew previously. If in doubt check this against the light bar.

Once happy, drill through the pilot holes with your 7mm large drill. Do this both sides.

Insert the stainless nuts into the aperture on the lower of the sides as shown below.

**WARRANTY & DISCLAIMER** - TerrafirMa products are warranted free from defects in materials and workmanship for a period of 12 months from the date of retail invoice. TerrafirMa does not warrant that the products manufactured or marketed by it comply with the laws of the country where those goods are purchased or used. It is the sole responsibility of the purchaser to ascertain whether products being purchased, or the fitting of those products to any other object, comply with local laws. This warranty covers structural defect and workmanship but does not cover finishes, labour charges for removal or refitting, freight costs, accident damage, misuse or abuse, damage due to incorrect or improper fitment or application, modified product, faulty design or consequential damage of any kind. Damage or defects caused by collision, alteration, improper installation, road hazards, adverse conditions or usage for any other purpose other than normal private usage are not covered by this warranty. TerrafirMa shall not be liable for any other claim relating to the use of the product and any indirect special or consequential damage or injury to any person, company or other entity. All claims must be accompanied by the original retail invoice and should be submitted to the supplying Allmakes 4x4/TerrafirMa distributor. This warranty covers only the replacement of the product or part concerned. The decision remains solely at the discretion of Allmakes Ltd. The information contained in this catalogue was correct at the time of going to press. Allmakes/TerrafirMa and its associated companies reserve the right to alter the range and any product specifications without notice. Always consult your Allmakes/TerrafirMa distributor for the latest product information and specifications. The TerrafirMa range of products is constantly being evaluated for enhancement and improvement to make sure the level of quality and performance is as expected.

Offer the bar up to the holes you just drilled. Push one of the M6 button head screws with a washer through the rear hole and screw it carefully into the rear most nut in the bar. This will hold the bar in place so next do the same on the other side then the two fronts.

Tighten accordingly to your required torque.

Be aware that land rover roof sections can differ by up to 10mm side to side so you may need to manipulate the bar sides to align the holes with the nuts.

**Note:**

**If in doubt measure twice, drill once!**
